ANSH ANAND MUTATKAR

BTech Computer Science & Engineering | Bhopal, India
anshmutatkar@gmail.com | linkedin.com/in/ansh-anand-mutatkar-a67648378 | github.com/ItzMeDKKnight

SUMMARY

2nd-year BTech CSE student who builds working AI and web projects, from a voice assistant to a label-compliance checker. Finalist at the GDG on Campus Hackathon and InnovX, and qualified for the Smart India Hackathon online round. Also organise college events and registrations. Looking for an internship or entry-level software role.

PROJECTS

JARVIS: Voice Assistant *Python, Electron, Three.js/WebGL, Claude API, SQLite*
github.com/ItzMeDKKnight/JARVIS

- Built a privacy-first voice assistant for Windows that understands English, Hindi and Hinglish, with a wake word, speech-to-text, text-to-speech and Claude-powered replies.
- Added memory that persists between sessions, web search, app launching and a $5 per-session spending cap.
- Built a desktop interface with a live holographic arc reactor that reacts to the voice; speech stays on the device and only transcribed text is sent to the API.
- Wrote automated tests and documentation (architecture, security audit).

Label Saathi (SIH PS-26034) *Python, FastAPI, Claude API (Vision), ReportLab*
Team Packaging Ops, Smart India Hackathon 2026

- Built a system that scans product label images and checks compliance with the Legal Metrology (Packaged Commodities) Rules, 2011.

InTabPDF: Free PDF Toolkit *Python, JavaScript, Claude API*
github.com/ItzMeDKKnight/ITabPDF

- Built an open-source PDF toolkit with 32 tools (merge, split, compress, convert, sign, OCR, compare, redact) that runs entirely on the user's own computer, so files are never uploaded.
- Added AI tools (summarise, translate) that use the user's own API key, and security checks against cross-site requests.
- Included automated tests and one-click start scripts for Windows, macOS and Linux.

Aero Visual: F1 Aerodynamics Visualizer *JavaScript, Three.js, WebGL, Machine Learning*
aero-visual.vercel.app

- Built a 3D F1 aerodynamics visualizer that combines an ML model with horseshoe-vortex and source-panel methods.
- Deployed live on Vercel.

ACHIEVEMENTS

- Finalist, Google Developer Group on Campus Hackathon
- Qualified for the online round, Smart India Hackathon 2026
- Certificate, TEDxOIST
- Finalist, InnovX
- Certificate for research paper, IEEE RISE Conference
- Submitted Bridge, a design for an offline, end-to-end encrypted mesh messaging app, to Samsung Solve for Tomorrow 2026

LEADERSHIP & EVENT EXPERIENCE

- **Google Form Management Head,** college freshers event: led registrations and form management.
- **Member, event planning, games hosting and food management teams,** college freshers event.
- **Volunteer,** college seminars and an AI workshop; upcoming AWS event volunteer.
- **Official Discord Moderator,** Garena Free Fire: enforced rules and safety in a large public gaming community.

TECHNICAL SKILLS

Languages	Java, C++, C, Python, JavaScript, TypeScript
Web & Frameworks	FastAPI, HTML/CSS, Three.js, WebGL, Electron
AI & APIs	Claude API (text and vision)
Tools	Git, GitHub, VS Code, IntelliJ IDEA
Currently learning	Data Structures & Algorithms in Java

EDUCATION

Bachelor of Technology, Computer Science & Engineering Expected 2029
Oriental Institute of Science and Technology, Bhopal CGPA: 8.19 (1st Semester)
